ANNUAL REPORT 2021-22

"The secret of leadership is simple: DO"

Email: indigenousdevelopment20192gmail.com

Contact: 9848956344, 9963147549

Address: 6-194, Gattumalla Village, Laxmidevipally Mandal, Bhadradri
Kothagudem District, Telangana 507101

Registered Address: 4-6-131, Kammari Basthi, Hayathnagar, Rangareddy
District, Telangana 501505

LIST OF THE BOARD MEMBERS 2019-2020		
DESIGNATION	NAME	BACKGROUND
President	Dr. N. Ravindra Rao	Doctor
Vice President	Mogili Vijender	Social Entrepreneur
Secretary & Founder	Dr. R. Narendar	Doctor
Treasurer	Mahesh Mandava	IT Professional
Joint Secretary	K. Mallikarjuna Rao	Business
Executive Member	B. V. Radhakrishna Murthy	IT Professional
Executive Member	Dr. Suresh Reddy	Doctor

- ABOUT NGO:** We are working with tribal communities in the interior forest habitations (IFHs) & rural villages of the Bhadradri Kothagudem district, Telangana. Tribal communities comprise 37% of overall population in the district. Bhadradri Kothagudem shares its boundaries with Khammam, AP & Chhattisgarh. Majority of tribal communities do not have access to universal healthcare services & due to poor economic status they cannot afford healthcare, nutrition and access to education.
 Inspired by the philosophy of Sri. APJ Abdul Kalam and humanitarian works of Dr Hanumappa Sudarshan, Dr Prakash Amte and Dr Abhay Bang, Dr Narendar (Founder) in 2016-17 started to visit various regions to understand the needs of communities & finally came across the Bhadradri Kothagudem district in Telangana. After looking at the challenges faced by tribal communities, he decided to work for them & started staying with them since then.
- OUR MISSION:** We work with marginalized communities – tribal, rural, women and children – bringing health awareness, providing access to healthcare services, nutrition and education, bringing in community empowering models to address those challenges. The model focuses on reducing deaths, diseases, malnutrition & illiteracy.
- Indigenous Development Organisation strives to achieve its objectives through following programs:
 1. Health Clinic at Gattumalla village
 2. Monthly Training sessions for Community Health Workers
 3. Home-based maternal & newborn care
 4. Seemantham monthly event for pregnant women
 5. Nutrition program & Nutritional assessments
 6. Bridge schools

As interior regions of the district have poor access to healthcare & the tribal community has poor health seeking behaviour, owing to this the maternal and child health indicators are poor in the district. Infant mortality rate is very high. Malnutrition, Anaemia & Malaria prevalence is also very high.

HEALTH CLINIC:

- The health clinic was setup at Gattumalla village, Lakshmidhevipalli mandal, Bhadrachalam district with an aim to establish a channel where the patients requiring further diagnosis/ interventions can be brought-in by our trained CHWs and also for over 15000 population around this clinic to reach us conveniently.
- Primary healthcare services (Allopathic & Homeopathic), Antenatal screening & routine lab investigations are done at the clinic.

Health clinic- Patients visits & services – 2021-22	
Total outpatient visits	5638
Patients re-visits	3157 (56%)
New patient visits	2481 (44%)
Antenatal Checkups done	268
High-risk pregnancies identified & treated	69
Patients Referred to Higher centre	52
Patients availing blood investigations	1744

COMMUNITY HEALTH WORKERS MONTHLY TRAINING:

To address the challenges in interior habitations, we have identified one community member from each habitation. These individuals have been motivated & regularly trained by our team to provide much needed healthcare services at the door-step (Home Based) to their community members. These individuals are called “Community Health Workers” (CHW).

Each CHW has been provided with medical kit to provide the health services within the habitation & early identification of high-risk cases which need referral to institutions. The whole idea of this CHW program is to empower the local youth to take charge of their health & also of their community.

Now our trained CHWs can identify high-risk newborns & high-risk pregnancies. They can also do malaria tests and within minutes identify the type of malaria, provide treatment and also refer high-risk cases to higher centre if needed.

INTERVENTIONS DONE BY COMMUNITY HEALTH WORKERS WITHIN HABITATIONS	
Community health workers trained	51
Mandals covered	13
Habitations covered	54
Population covered	10000+
No. of Pregnant women - Antenatal checkups	232
High -risk pregnancies identified & referred	57
No. of safe deliveries conducted at habitation	45
Home based newborn care	307
Total malaria screening done	889
Total malaria cases identified & treated	586
Tuberculosis Cases identified & done followups	17
Patients referred to higher centres	154

STORY OF TRANSFORMATION FROM A POOR HEALTH SEEKER TO A COMMUNITY HEALTH WORKER:

During one of our medical camps, we came across Madavi Sammakka, a 22 year old female, from interior tribal habitation SIRTHANPADU which has very poor connectivity and is 5 kms from nearest connectivity point.

She had severe anaemia where we had found with our medical kit that her haemoglobin was only 1 GRAM/DL & she was resisting the admission to hospital as the majority of community members are usually afraid to visit hospitals due to various traditional beliefs/taboo and like several others in the community, her family also believed in black magic. Few people told us that black magic was doing no good to her, several weeks had passed but she was not recovering & was unable to carry out her daily activities. It was affecting her livelihood also.

After counselling them for almost 1 hour, she was taken to Bhadrachalam Govt Hospital for blood transfusion. Meanwhile when we were getting the blood donors ready, she fled from the hospital back to her habitation. We had to go back to the habitation & counsel her that it may be fatal if transfusion was not done in-time. Finally 2 units of blood transfusion were done & supplements were provided to ensure

she recovers well. Now she has 11.9 GRAMS/DL haemoglobin. Moreover she understood that timely intervention has brought a huge change in her health. She came forward to serve her community & is now “community health worker” providing healthcare services to the needy in her habitation.

SEEMANTHAM (BABY SHOWER EVENT):

To effectively screen all the pregnant women across the tribal habitations, a baby shower event is conducted every month in our health centre premises at Gattumalla village. A group of 25-30 pregnant women from various habitations are invited to our centre on 7th of every month for this event. As a ritual, all the participating pregnant women are provided with new sarees, bangles & fruits. A complete Antenatal Check-up (ANC) is done for each pregnant woman.

Our team conducts health education session for these pregnant women explaining the importance of taking supplements, mentioning Do's and Don'ts as wells as motivating them to go for institutional deliveries against the more common tradition of home deliveries.

Traditional tribal songs in their local language & dance are performed by our community health workers at the end of event making the pregnant women experience the moments of joy.

NUTRITION PROGRAM & NUTRITIONAL ASSESSMENTS:

Malnutrition & Anaemia prevalence in Under-5 age children and pregnant women is highest in tribal population.

According to our study, 70.2% children are underweight & 62.4% of them have wasting. 99% pregnant women and 98% under-5 age children have anaemia.

I-DO has started providing them our own formulated nutrition powder which has to be consumed every day. To ensure this, spot feeding program has been planned in all the 51 habitations covering over 1800 beneficiaries.

In Under-5 age children, nutritional assessments are done by our team once in 6 months. We were glad to note 39.54% improvement in anaemia cases due to spot feeding program

BRIDGE SCHOOLS:

In the interior habitations there are no anganwadi centres or schools which made education inaccessible to the tribal habitation children. Sending children directly to mainstream schools also was challenging.

To fill this gap we have established 13 BRIDGE SCHOOLS in 13 habitations itself, where they get basic education & mid-day meal. After identifying potential students we motivate them to join into mainstream schools.

No. of children in our bridge schools	400+
No. of children joined to residential mainstream schools	74

AUDITOR'S REPORT

To the Members of Indigenous Development Organization

We have audited the standalone financial statements of INDIGENOUS DEVELOPMENT ORGANIZATION (the "Society"), which comprise the Statement of Affairs as at 31 March 2022, and the Income and Expenditure Statement for the year ended on that date.

Management is responsible for the Preparation of these financial statements that give a true and fair view of the financial position of the Society. This responsibility includes the design, implementation, and maintenance of internal controls relevant to the preparation and presentation of the financials statements that give a true and fair view and are free from material misstatements, whether due to fraud or error.

Our responsibility is to express an opinion on these financial statements based on my audit. We have conducted our audit in accordance with the generally accepted auditing standards in India. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosure in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the management, as well as evaluating overall financial statements presentation. We believe that our audit provides a reasonable basis for our opinion.

We report that;

1. We have obtained all the information and explanation which to the best of our knowledge and belief were necessary for the purpose of the audit.
2. In our opinion, proper books have been kept by the Society so far as appears from our examination of those books.
3. The balance sheet and income and expenditure dealt with by this report are in agreement with books of account.
4. In our opinion and to the best of our information and according to the explanations given to us, the financial statements give a true and fair view in the conformity with the accounting principles generally accepted in India;
 - a. In the case of the statement of Affairs, of the state of affairs of the Society as at 31st March, 2022; and
 - b. In the case of statement of Income and Expenditure, of the excess of income over expenditure for the year ended on that date.
